RE: KCC Groundwater Study

Steve McNeal of the Division of Environmental Health/Water Pollution today informed me of a February 19, 1985 meeting of the KCC study technical group. Dianne and I would like you to represent the Division at this meeting and at future meetings which will be held in the KCC offices in Salt Lake City. Steve indicated that we will receive written notice at a later date.

Steve needs specific information at this time relative to the adequacy of water monitoring wells proposed by KCC. Please examine the study proposal with this in mind; also, remember that the company has made a commitment to install future wells, if needed. Wayne can provide you with a copy of the study proposal.

If you have questions, or need to call on the expertise of additional staff members, let's discuss these aspects at your convenience.
